- Weather-resistant display casing along with ultra-bright LEDs are available for outdoor applications
- Microframe's Take-A-Number Systems offer a variety of multicolored ticket options and feature large, easy-to-read displays
- Many others...

TAKE-A-NUMBER DISPLAY

The Take-A-Number System is a popular and effective solution for managing your waiting customers. The Take-A-Number display shows the number currently being served. Customers pull a ticket from the dispenser and watch as clerks progress the numbers one at a time on the LED display, anticipating their number being shown for service.

From the factory the display is preprogrammed with 5.5-inch tall numbers viewable from up to 125 feet. The Take-A-Number System can be displayed on a counter top (similar to a computer monitor) or hung on the wall with a bracket (provided). Microframe designed the LED Take-A-Number System to utilize wired and wireless controls. For your convenience, Microframe has included each system with a wireless remote, 2 brass push buttons, and 40-feet of wire (free of charge) to connect to the back of the display.

(Displays include 2 push buttons, 40' of wire,
20' of communication wire, and power adapter)

Take-A-Number Accessories

WIRELESS OPERATION

With our convenient remote control you can advance the numbers, go back a number, or reset the numbers. Multiple remotes can be utilized within line of sight for up to 30 feet. Extend your wireless functionality with an optional Wireless Push Button Kit (B4050_1). The RF Wireless Button receiver works with the RF Wireless Button transmitter (B4002) and works with all Microframe's Take-A-Number displays. If used with the 5100 Take-A-Number System, the display will increase or decrease the number on the display one at a time.

WIRED OPERATION

Each Take-A-Number system includes two push buttons with 40-feet of wire (free of charge) for manual/wired operation. Additional push buttons and wire may be added as needed.
