- LED displays offer internal and external chime features
- Microframe's Take-A-Number Systems offer a variety of multi-colored ticket options and feature large, easy-to-read displays
- Weather-resistant display casing along with ultra-bright LEDs are available for outdoor applications

TAKE-A-NUMBER DISPLAY

The Take-A-Number System is a popular and effective solution for managing your waiting customers. The Take-A-Number display shows the number currently being served. Customers pull a ticket from the dispenser and watch as clerks progress the numbers one at a time on the LED display, anticipating their number being shown for service.

WIRELESS OPERATION

With our convenient remote control you can advance the numbers, go back a number, or reset the numbers. Multiple remotes can be utilized within line of sight for up to 30 feet.

WIRED OPERATION

Each LED display includes two push buttons with 40 feet of wire (free of charge) for manual/wired operation. Additional push buttons and wire may be added as needed.

DISPLAY

Microframe's Take-A-Number Systems provide flexibility and organization for your changing business needs. The Take-A-Number Displays are available in 2 or 3-digits featuring 5.5" characters visible up to 125 feet. Each display is designed with "picture-style" wall mounts for easy installation. Optional ceiling mounts are available if needed. Every display is equipped with an internal audio chime that can be adjusted or turned off. With simple and easy-to-follow installation instructions, customizing your Take-A-Number System has never been easier.
