

Model B4002 Keyfob and B4050 receiver

Description

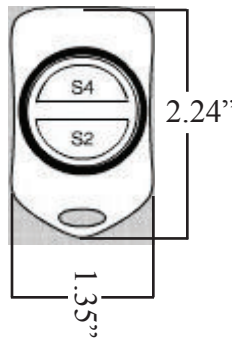

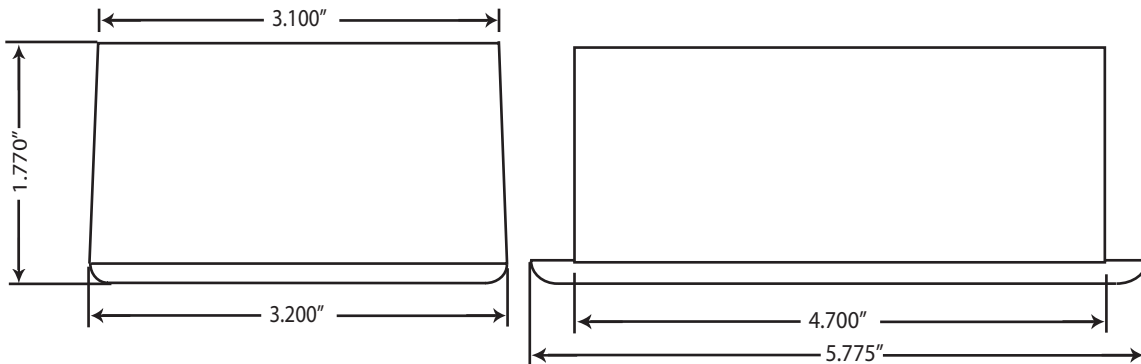

The RF Wireless Button transmitter works with the RF Wireless Button Receiver (B4050) and is used primarily with the 6300 and 5100 Series displays. If used with Microframe's 5100 Take-A-Number System, the display will increase or decrease the number on the display one at a time. If used with a 6300 display in "timer" mode, the RF Wireless Button will start and stop the timer.

B4002

B4050

Model B4050 Specifications

Voltage Input Requirements	12 volts DC
Case	Plastic
